

Solutions that work!

inTemail has a well-earned reputation for effective, long-lasting solutions for any mail production environment.

inTemail products – intelligent mailing systems, feeders, software, integrity management – are hard at work around the world in the most demanding production environments. It is in these situations that inTemail has earned its robust reputation – day in day out, the inTemail platform has proven its versatility and consistency.

inTemail intelligent mailing systems

inTemail has a proven range of the most versatile, high speed, high volume intelligent mail processing systems. The modular configuration of inTemail systems is available in two series:

Series C5 - for processing envelopes up to C5 size, at a cycling speed of up to 11,000 per hour.

Series C4 - for processing envelopes up to C4 size, at a cycling speed of up to 7,000 per hour.

inTemail intelligent mailing systems can be used in either **Intelligent Mode** where the feeder, inserter and sorter are all in intelligent mode.
